Recursos bibliográficos para Atención Primaria en las bibliotecas virtuales de salud de las comunidades autónomas

Atención Primaria, 45(3), 165-171, 2013
<https://doi.org/10.1016/j.aprim.2012.05.013>

Authors

Verónica Juan-Quilis - Biblioteca Virtual del Sistema Sanitario Público de Andalucía-BV-SSPA, Sevilla, España

Abstract

The Statement by the Spanish Society of Family and Community Medicine (SemFYC) on access to scientific information, highlights the need for providing digital libraries with certain resources in Autonomous Regions. The primary goal is to study the evidence-based medicine (EBM) coverage that SemFYC recommends regional virtual libraries. The regional health virtual libraries were identified and the access provided to health professionals, Internet presence, remote access and resources were studied. The results suggest there is ample coverage in 8 Autonomous Regions. At the top of the list was, Health Sciences Virtual Library of Navarre, the Balearic Islands Health Sciences Virtual Library, and Virtual Library of the Andalusian Public Health System. The present study needs to be extended to the other biomedical sciences, in order to obtain more accurate results.

Métricas

About the metrics ✕

Publication citations

Citation Count is the number of times that this paper has been cited by other published papers in the database.

Altmetric Attention Score

The Altmetric Attention Score is a weighted count of all of the online attention Altmetric have found for an individual research output. This includes mentions in public policy documents and references in Wikipedia, the mainstream news, social networks, blogs and more. More detail on the weightings of each source and how they contribute to the attention score is available [here](#).

Relative Citation Ratio (RCR)

The Relative Citation Ratio (RCR) indicates the relative citation performance of an article when comparing its citation rate to that of other articles in its area of research. A value of more than 1.0 shows a citation rate above average. The article's area of research is defined by the articles that have been cited alongside it. The RCR is normalized to 1.0 for all articles.

Field Citation Ratio (FCR)

The Field Citation Ratio (FCR) is an article-level metric that indicates the relative citation performance of an article, when compared to similarly-aged articles in its subject area. A value of more than 1.0 indicates higher than average citation, when defined by FoR Subject Code, publishing year and age. The FCR is calculated for articles published in 2000 and later.

Citation Recency

The recent citations value is the number of citations that were received in the last two years. It is currently reset at the beginning of each calendar year.

Patent citations

Patent citations is the number of times that this record has been cited by other published patents. Patents may be registered in several offices, and this may effect patent citation data.

Búsqueda compleja

The screenshot shows the Dimensions search interface. On the left is a dark blue sidebar with the 'Dimensions' logo and a 'FILTERS' section. The main search area is white and contains a search bar with the query 'aguillo AND CSIC NOT ignacio'. Above the search bar, there are several filter boxes: '2001 OR 2008 OR 2010 OR 2012 OR 2011 OR 2013' (Publication Year), 'OR 2016 OR 2017 OR 2018' (Publication Year), '1606 Political Science OR 0104 Statistics OR 1303 Specialist Studies In Educ...' (Fields of Research), '1402 Applied Economics OR 1608 Sociology OR 0806 Information Systems' (Fields of Research), and 'Chapter OR Proceeding' (Publication Type). Below the search bar, there are radio buttons for 'Search in: full data' (selected) and 'title and abstract only', and a link for 'Abstract Search'.

Acceso abierto

The screenshot shows the Dimensions Open Access search results page. The header includes the Dimensions logo, a search bar with the query 'Open Access', and a 'Supp' button. The left sidebar contains filters: PUBLICATION YEAR, RESEARCHER, FIELDS OF RESEARCH, PUBLICATION TYPE, SOURCE TITLE, JOURNAL LIST, and OPEN ACCESS. The OPEN ACCESS filter is selected, showing 19,356,962 results. The main content area displays a list of publications. The first publication is 'A short history of SHELX' by G.M. Sheldrick, published in 2008 in Acta Crystallographica Section A: Foundations and advances - Article. It has 63k citations and an Altmetric score of 69. The second publication is 'DNA sequencing with chain-terminating inhibitors' by F. Sanger, S. Nicklen, and A. R. Coulson, published in 1977 in Proceedings of the National Academy of Sciences - Article. It has 52k citations and an Altmetric score of 62. A sort dropdown menu is open, showing options: Relevance, Publication Date, RCR, Citations (selected), and Altmetric Attention Score. The RCR metric for the second publication is 1.21.

20% (y subiendo) de los registros son ítems de acceso abierto
Se pueden ordenar por fecha, número de citas y otras indicadores tanto biblio- como altmétricos

Perfil de investigador

- Filtrar en búsqueda de “Researchers” (More, Search, autocompletado) sobre el total de publicaciones
- Datos externos ligados a identificadores: ORCID, ResearcherID, Scopus AuthorID

The screenshot shows the 'Dimensions' search interface. On the left, there is a 'FILTERS' sidebar. Under 'RESEARCHER', a list of names and their publication counts is displayed. At the bottom, a search input field contains 'isidro f', and a dropdown menu shows suggestions for 'Isidro F Aquillo', 'Isidro Fabreques', 'Juan Isidro Franco', 'Francisco Isidro Masetto', and 'Isidro Fabela'.

RESEARCHER	Count
<input type="radio"/> Roman Gladyshevskii	7,887
<input type="radio"/> K Cenual	7,706
<input type="radio"/> Ch Wohlfarth	7,013

<input type="radio"/> V Gupta	3,573
<input type="radio"/> Anna I Glushenkova	3,153
<input type="radio"/> V Kuprysyuk	3,130

The screenshot shows the profile page for 'Isidro F Aquillo', a researcher at the 'Instituto de Políticas y Bienes Públicos - Madrid, Spain'. The profile includes a search bar with the name and a close button. Below the name, there are links for 'ORCID record' and 'Scopus Author ID'. The profile is divided into sections: 'Overview' (with a sub-section for 'Experience & Education') and 'Publications' (showing 66 publications and 878 citations). A disclaimer at the bottom states that the information is aggregated from various sources and provides a link to 'contact us'.

API

Querying the database

DOI	<code>http://metrics-api.dimensions.ai/doi/[doi]</code> Fetches the article corresponding to the given DOI.
PMID	<code>http://metrics-api.dimensions.ai/pmid/[pmid]</code> Fetches the article corresponding to the given PMID (PubMed ID).
Dimensions ID	<code>http://metrics-api.dimensions.ai/id/[DimensionsID]</code> Fetches the article corresponding to the given Dimensions ID.

Response object

<code>id OR pmid OR doi</code>	Indicates the value of the identifier used in the query i.e DOI, PMID or Dimensions ID
<code>times_cited</code>	'Times cited' indicates the number of times a publication was cited by other publications. We count citations from the reference list in all publications that are indexed in Dimensions. <code>times_cited</code> is for all years.
<code>recent_citations</code>	'Recent citations' is the number of citations received in the last two years. Note: The citation date used in the calculations rolls over in the middle of the year. For example in 2017 the calculation looks at citations from 2015 for the months of 2017-01 till 2017-06 and switches to citations from 2016 from 2017-07 onwards.
<code>relative_citation_ratio</code>	'Relative Citation Ratio' (RCR) indicates the relative citation performance of an article when compared to other articles in its area of research. A value of more than 1.0 shows a citation rate above average for this group, when defined by the subject area citation rates of the articles that have cited it. Articles that are less than 2 years old, or do not have citations, do not have an RCR.
<code>field_citation_ratio</code>	'Field Citation Ratio' (FCR) indicates the relative citation performance of an article, when compared to similarly-aged articles in its subject area. A value of more than 1.0 shows citation above average for this group, when defined by FoR Subject Code, publishing year and age. The FCR is normalized to 1.0 for this selection of articles. Articles that are less than 2 years old do not have an FCR. An article with zero citations has an FCR of 0.
<code>highly_cited</code>	Note: The <code>highly_cited</code> flags will be applied post launch, and indicate when an article has had an FCR in the top 10, 5 or 1% when compared to articles of a similar age, publication year and subject area. Once an indicator has been set to true, it persists in that state.
