

-
In many areas of Spain, **FARMERS ARE CHANGING PLANTING OR HARVESTING SEASONS** to adapt to earlier springs or longer summers

-
Municipalities have begun shading public spaces such as streets and squares to **PREVENT THE HEAT MAKING THEM UNINHABITABLE**

-
Coastal cities begin to take into account estimated **FUTURE RISING SEA LEVELS** in their urban planning

HOW DO WE PREPARE TO ADAPT TO A CHANGING CLIMATE?

change with the climate

-
THE CHANGING CLIMATE **POSES CHALLENGES** to those responsible of water management, conserving biodiversity, managing forests, health, cultural heritage and transport infrastructure...

-
BECAUSE WHEN THE CLIMATE CHANGES, **ALMOST EVERYTHING MUST ADAPT**

-
ADAPTING to a changing climate **DOES NOT MEAN GIVING UP ON THE FIGHT AGAINST CLIMATE CHANGE:** without new efforts to reduce emissions, our adaptive capacity will sooner or later fail to keep up

**JOIN AND
PUSH FOR
CHANGE!**
